

This exciting textbook combines a clear introduction to the themes traditionally covered in the philosophy of religion with contemporary developments in the discipline. The combination of traditional and alternative approaches makes it the most innovative introduction to the area currently available, while a range of exercises and student features provide a lively and accessible approach to the discipline. Most introductions to the philosophy of religion turn out, in practice, to be philosophic defences of religious belief, concentrating solely on the theistic tradition. This book differs from such an approach by offering a range of alternative views and in particular by examining the human dimension of religion and religious belief. Thus alongside helpful clarifications of such traditional issues as arguments of the existence of God, the problem of evil, and immortality, this book also addresses more neglected areas like natural histories of religion, feminist approaches, and revisionary accounts of religious belief. The book ends with reflections on the future of religion. The Philosophy of Religion will be essential reading for all students of the subject as well as the interested lay reader.

Letters From A Captive Heart: America's Heartbreak in the POW Camps of North Korea, The Four Cs for Building Healthy Relationships, Park Superintendent (Passbooks), Estate Planning for Domestic Partners: The Legal Secrets You Need to Know to Protect Your Partner and Your Future, Eight Weeks to Optimum Health, New Edition, Updated and Expanded: A Proven Program for Taking Full A,
