

It's a scientific fact: Women rock! A charmingly illustrated and educational book, *Women in Science* highlights the contributions of fifty notable women to the fields of science, technology, engineering, and mathematics (STEM) from the ancient to the modern world. Full of striking, singular art, this fascinating collection also contains infographics about relevant topics such as lab equipment, rates of women currently working in STEM fields, and an illustrated scientific glossary. The trailblazing women profiled include well-known figures like primatologist Jane Goodall, as well as lesser-known pioneers such as Katherine Johnson, the African-American physicist and mathematician who calculated the trajectory of the 1969 Apollo 11 mission to the moon. *Women in Science* celebrates the achievements of the intrepid women who have paved the way for the next generation of female engineers, biologists, mathematicians, doctors, astronauts, physicists, and more! From the Hardcover edition.

Ephemeroptera of South America (Aquatic Biodiversity of Latin America), *The Caudillo of the Andes: Andres de Santa Cruz (New Approaches to the Americas)*, *Catechisme bouddhique : enseignement du Bouddha Gautama (French Edition)*, *Three Gates to Meditation Practices: A Personal Journey into Sufism, Buddhism and Judaism*, *The Best of Laugh Lines*, Kaplan 12 Practice Tests for the SAT 2015 (Kaplan Test Prep),
